

NGS

NEW GENERATION SECURITY

WHITEPAPER

<https://www.ngscoin.co/>

**The world's advanced blockchain based platform
with Secure, Fast and Infinite Opportunities.**

<https://www.ngscoin.co/>

INTRODUCTION

NEW GENERATION SECURITY

NGS is a network of independent nodes that provide a decentralized encrypted database service.

NGS Coin is a platform for the future of funding that is built on top of the Ethereum blockchain.

It accelerates growth of start-up companies by offering tools and services that save both time and resources.

Investors can use services to divide their investments between various services like P2P loans, crowdfunding, etc. The first version of the NGS Allows startups to launch and manage crowdfunding and campaigns.

While the NGS design is inspired by that of earlier blockchains, it also realizes decades of research across the fields of concurrent and distributed computation, mathematics, and programming language design.

The platform includes a modular, end-to-end design that commits to correct-by-construction software and industrial extensibility.

The NGS Blockchain Protocol and NGSToken (NGS) is native crypto token currency which is being created to be integrated with and used on the NGS network, for decentralized applications on the network. Initially, NGS is proposed to be issued and implemented on the public Ethereum blockchain as an ERC-20 compliant token. NGS team will integrate its existing "wallet" function to hold NGS balances, and allow users to utilize the tokens on the NGS platform shortly after the tokens are activated.

The NGS Payment gateway and wallets, as the most promising blockchain ecosystem for the payment industry, perfectly combines the advantages of leading cryptocurrencies and addresses the inherent problems of existing blockchain systems. It will continue to develop and iterate through the foundation of the platform, as well as through the products and practical business implementations. A new kind of economy mode will be formed by the Blockchain Economy to significantly enhance the efficiency of the industries, as well as society as a whole.

In addition to that, the payment industry backs the payment ecosystem to fulfill the demands of customers & merchant. There are many payment gateways/merchants are in the industry of Blockchain. However, the services of the NGS payment is totally different, unique, secure & better with extra facilities. Extra services of NGS includes payment gateway services, P2P chat, In-chat payment facility, merchant payment solutions, invoicing management, product management, order management & product support tools as well.

The foundation will provide transparency for payments management, financial management, code management and business practices for merchants, and will maintain high standards of honesty, ethical business conduct and compliance with applicable laws, rules, and regulations for the users.

An accounting firm has been engaged to provide financial report audit and compliance management services. The birth and the infancy stage of NGS have been strongly supported by the founding members, the development team, industry experts, early backers, lawyers and professional consultants. We would like to thank everyone who have made extraordinary contributions to the development of the NGS Blockchain Technology.

VISION AND MISSION

NGS BLOCKCHAIN Technologies team is committed to develop fully qualified & professional global blockchain community by cooperating with the other blockchain communities, third party services, developers and companies. The goal of NGS Blockchain team is to innovate the experience of using virtual currency in real life. Ultimately bring it into finance, business, product management, gaming, payments and internet industries. NGS Blockchain team is the compatible ecosystem to develop, enhance and bridge the real world applications into the blockchain. In the current era, there are many payment industries are in an existence based on the blockchain systems. The current market depends on the peer to peer payment transfers with proof of security. However, such a security are not possible with presently running systems. Thus, NGS Blockchain team want to provide extra facilities then the current available payment system providers. In addition to that, NGS Blockchain team has planned to provide real-time solutions for merchants & customers. Integration of all new blockchain based technologies and upcoming currencies is our aim to develop the NGS Blockchain.

Blockchain technology has a huge potential to create new bussines models and bring measurable benefits and value to the public and private sectors. To unlock this potential, NGS protocol was designed purposefully to tackle the main challenges which limit the fluent exchange and integrity of data in product smart chains. With smart chain data becoming increasingly fragmented, scalability and cost concerns of current decentralized solutions become evident. Using NGS, all stakeholders can securely share their data and keep sensitive data fully encrypted at all times. By supporting global standards for data exchange.

Web 3.0: The Third Generation Web is Coming

The Web is entering a new phase of evolution. There has been debate, which involved thinking about proper name. Web 3.0 is revolution in modern era. Some would prefer to not name it all, while others suggest continuing to call it “Web 2.0”. However, this new phase of evolution has quite a different focus from what Web 2.0 has come to mean. NGS mission is to create a “world changing data/financial tool/network”. NGS Blockchain Meets IoT. Building decentralized cutting edge blockchain environment = “Internet of Blockchains”

What is internet of blockchians?

The future of blockchain will not be one network to rule them all, but rather an interconnected network of multiple blockchains, much like the internet as we know it. The NGS technology makes blockchain networks work more like the internet. Just as the internet is a series of smaller physical networks, connected to a larger network through common protocols, NGS will connect smaller, diverse networks together to create a truly, global, scalable, and evolving blockchain Layer of the internet.

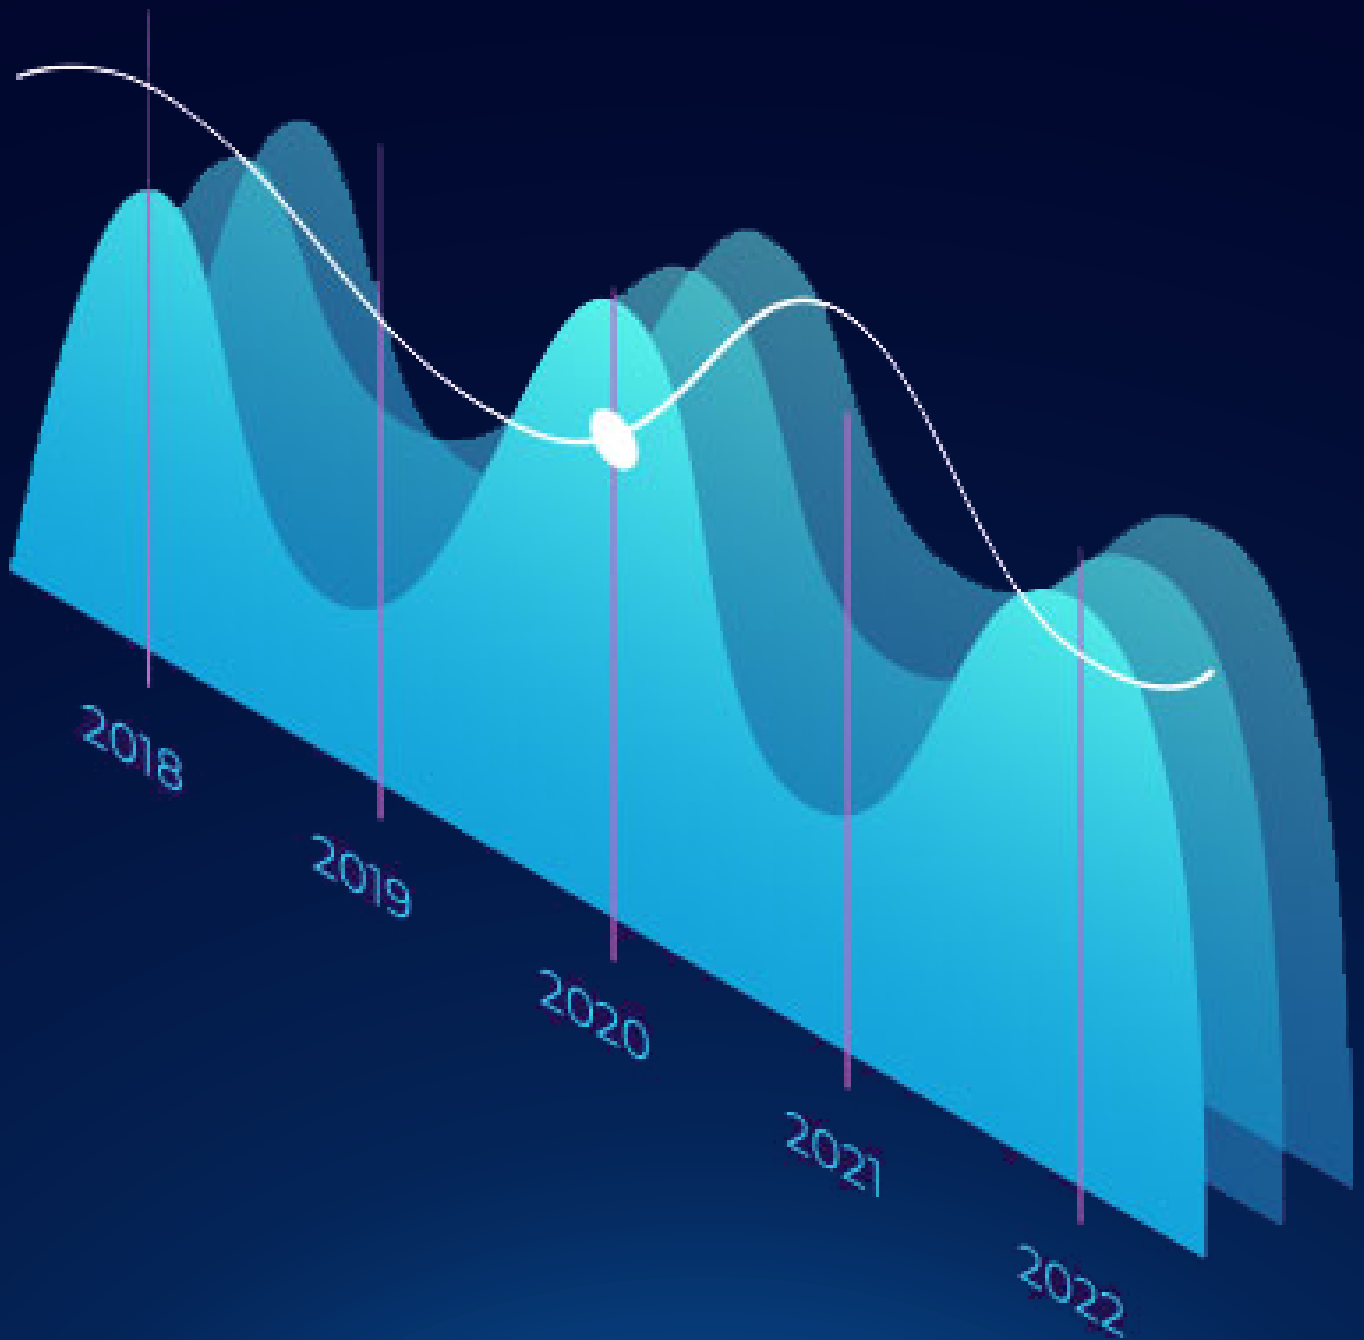

PROTECTING INVESTORS' INTERESTS

While we are helping start-ups to raise the funds, we care about investors whose investments' protection we wish to guarantee to the maximum extent. The voting system gives the investors bigger control over their investment.

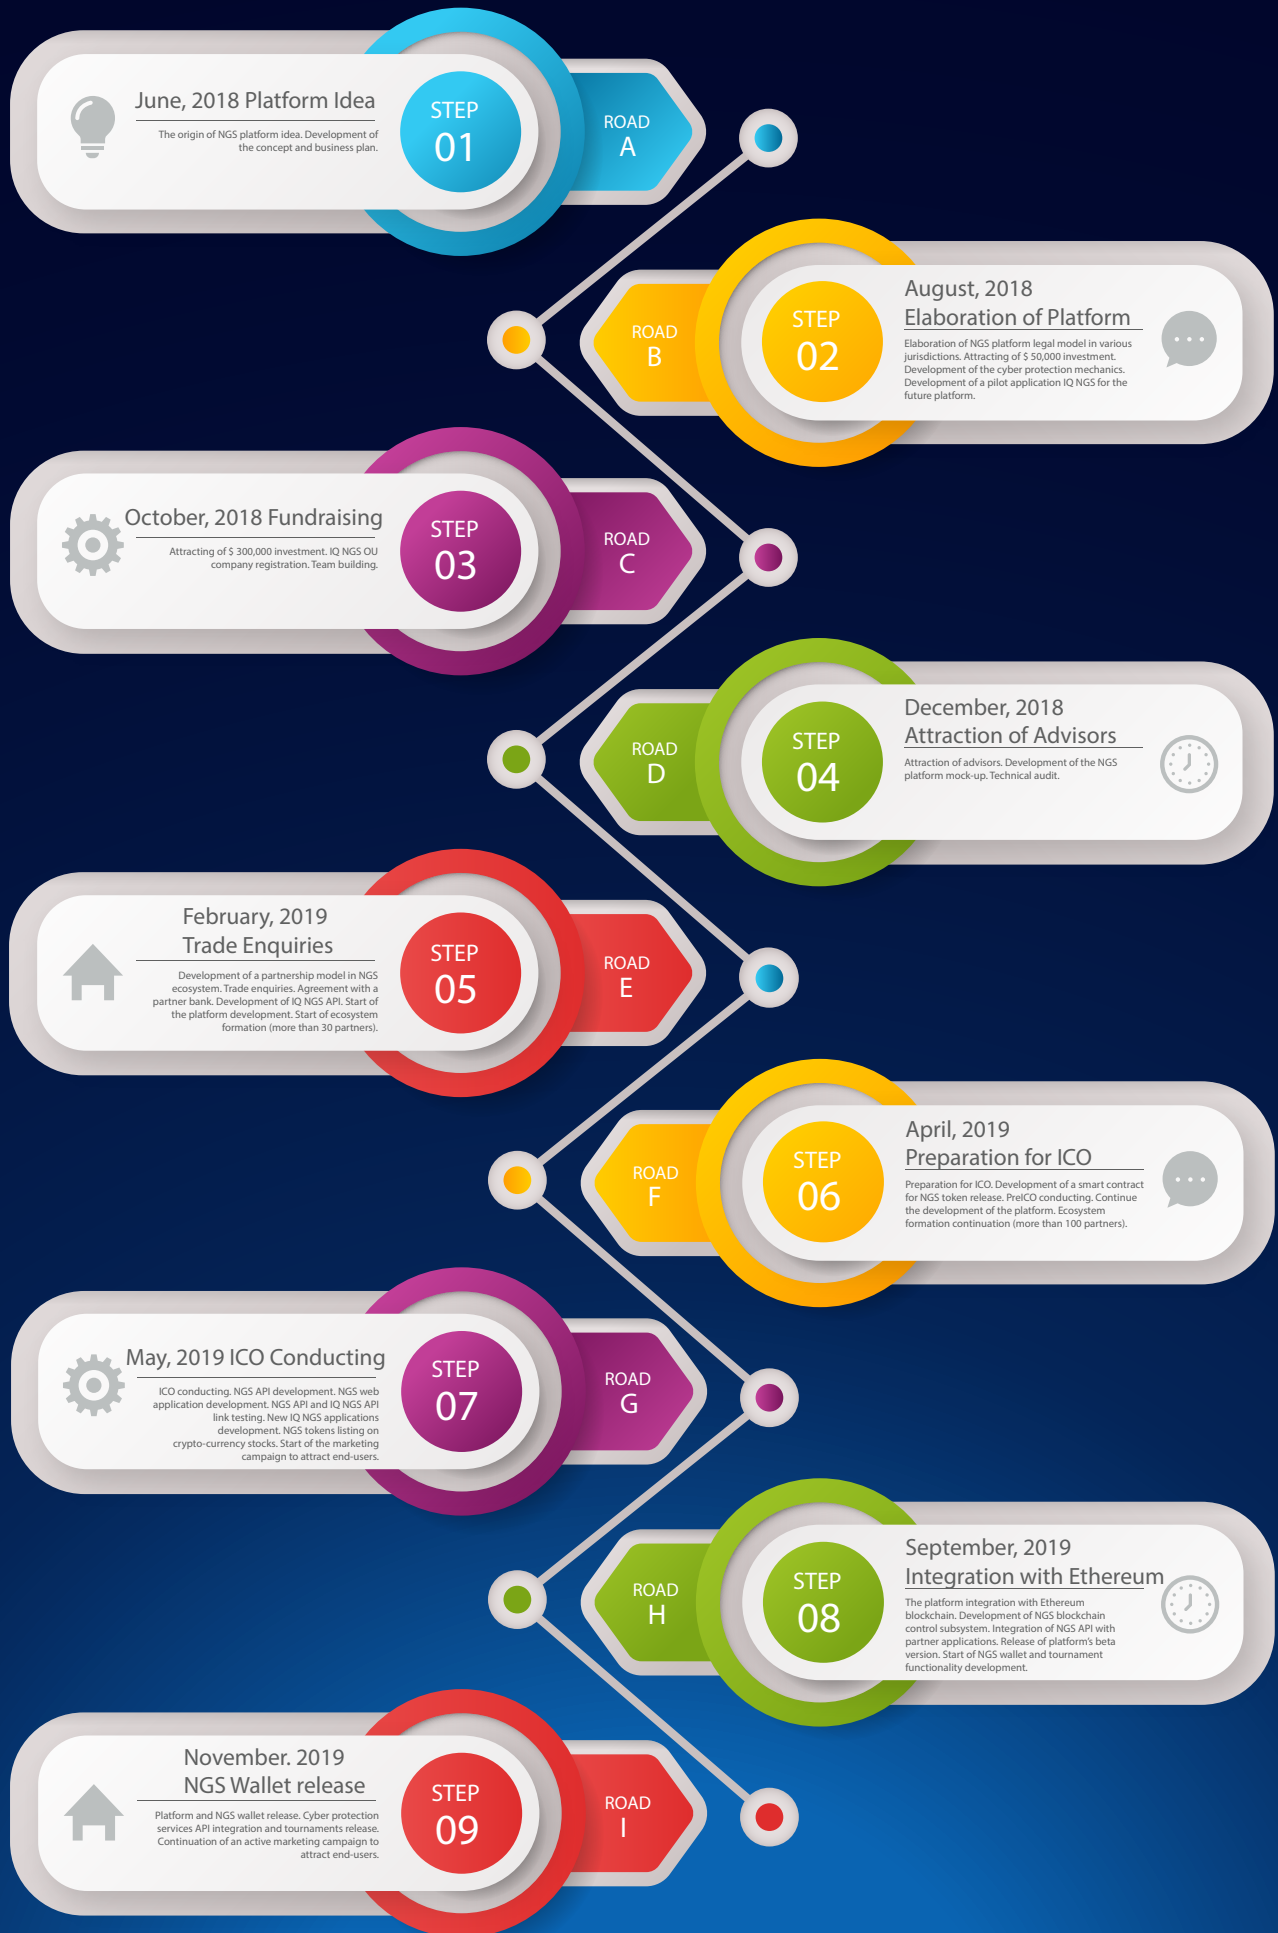

- ✔ Up to 2% NGS cashback on all transactions
- ✔ Exchange NGS for Bitcoin, Ethereum and 100+ more Cryptocurrency
- ✔ Trade NGS on 7 exchanges after ICO.
- ✔ (HitBTC, Bit-z, BitMart, Bitfinex, OKEx, Etherdelta, CoinBene)

WE BRING TOGETHER MARKETPLACES & FINANCE

The ultimate goal of NGS is to be the all-in-one solution and offer a wide array of services from market to finance. Our clients — both corporate and private ones Will access all the services they need from a single platform. Blockchain technology gives us the chance to make your finances grow faster and give better returns.

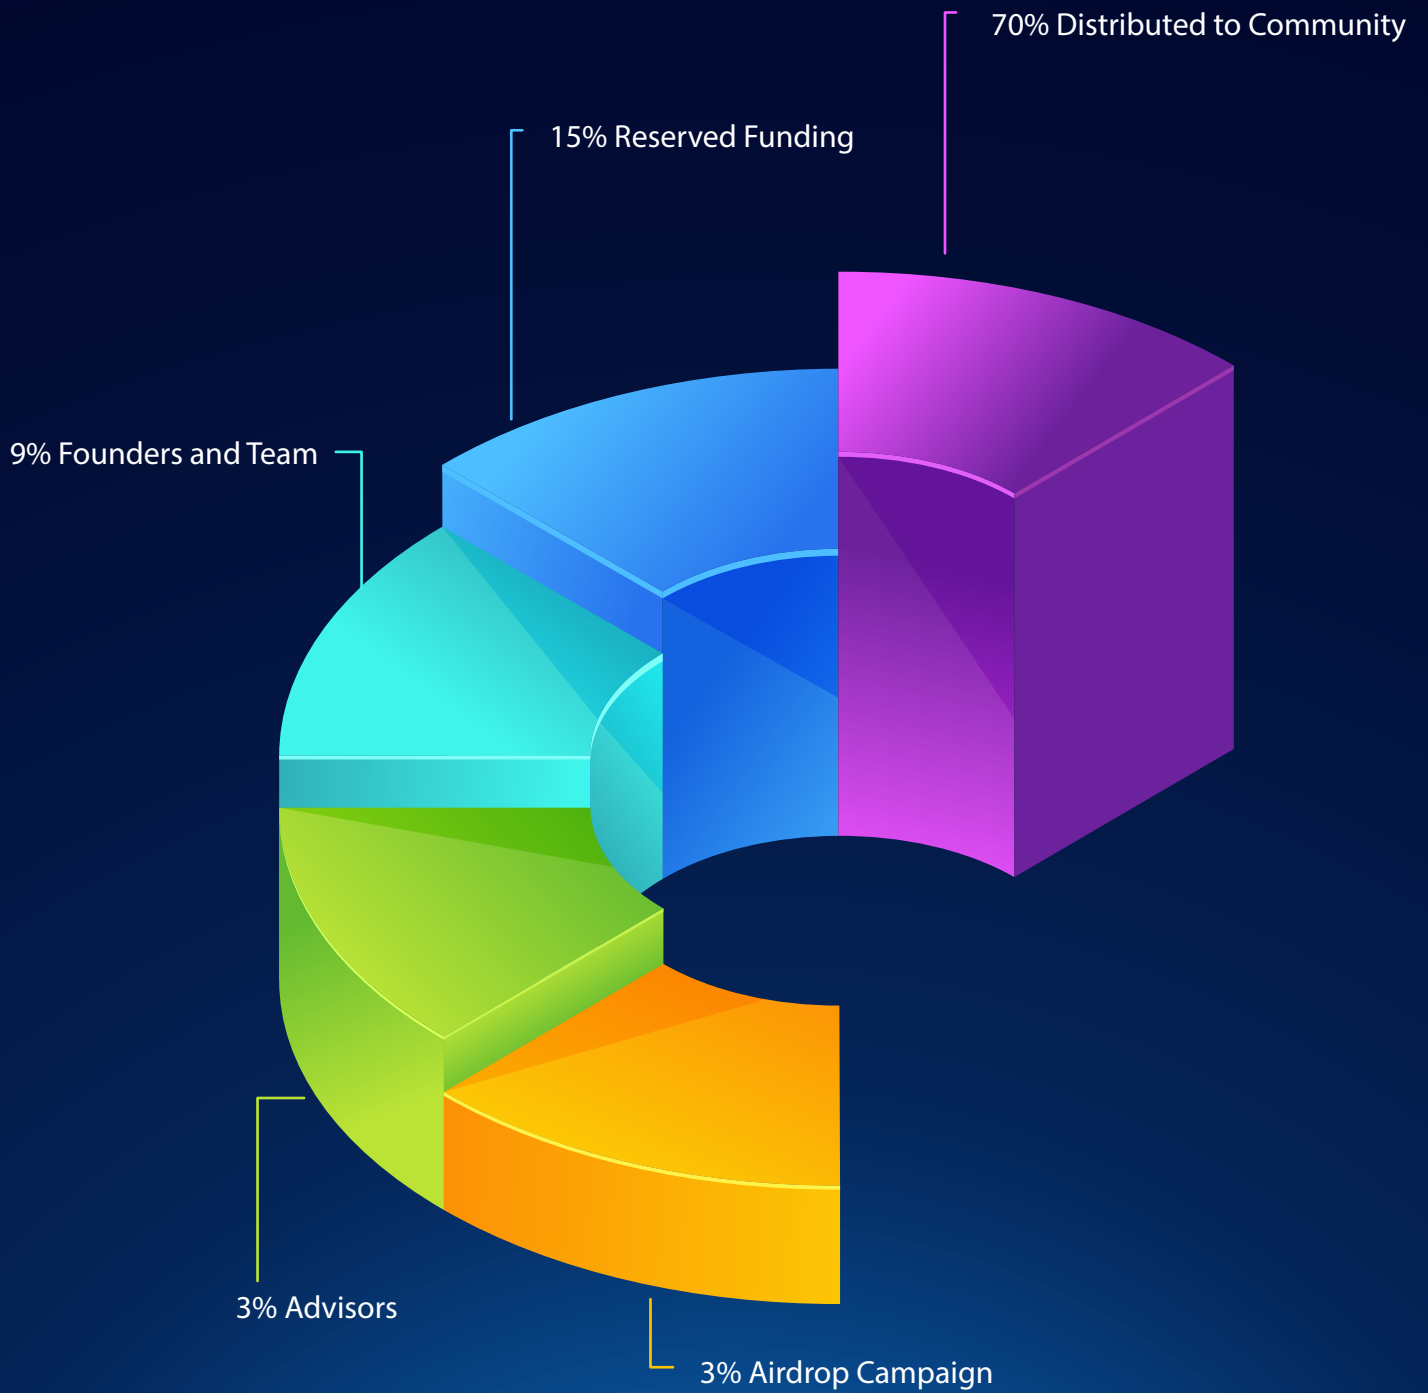

WHAT STAGE ARE WE AT?

NGS TOKEN STRUCTURE

TOKEN SPECIFICATION

- ✔ TOKEN NAME: NGS TOKEN
- ✔ TOKEN TICKER SYMBOL = NGS
- ✔ TOKEN DECIMAL = 8
- ✔ TOKEN PRE SALE PRICE 1 NGS = 0.01USD
- ✔ TOKEN PRICE IN ICO = 1 NGS = 0.1USD
- ✔ TOKENS CREATED = 20.000.000 NGS
- ✔ TOKENS FOR SALE = 14.000.000 NGS
- ✔ SOFT CAP= 5 MILLION USD
- ✔ HARD CAP = 30 MILLION USD
- ✔ PRE-SALE BONUS = UP TO 30%
- ✔ UNSOLD TOKEN WILL BE BURNED.
- ✔ CONTRACT : `0x9BaAF63b5B4C10600F82A934640dd9C070A5f260`

BONUS STRUCTURE

Early Members — Pre ICO

Users registered in the Pre ICO phase

- ✓ 30% Bonus on any purchase amount

New Members — ICO

Users registered in the ICO phase

- ✓ 1-11 days: 20% and 11-22 days: 11% Bonus

TEAM

NGS is backed by a strong technical team that has several years of experience in developing world-class IT solutions. The technical team is augmented by an experienced management team and a vibrant marketing team that leaves no stone unturned to make NGS successful.

Emily Harris
CEO

Emily is an engineering graduate. She has 8 years of entrepreneurship experience with 5 successful companies. Emily has transformed 5 different ideas into actual products That is successfully competing in their respective markets.

Emily portfolio includes:

- SSMS, logistics solution provider in UK
- Superwire Internet, an internet related solutions provider Based in the UK serving international markets
- HMFQ, an on-demand delivery startup which is the most Successful application amongst its competitors.
- AZ Internet, a block chain based financial technology solutions Provider in the Middle East, African, European and Asian markets.

Bennett Andrew
CTO

Bennett is an IT professional and comes with a 7 years Experience in the tech industry. He worked as the Tech Lead at BGM Animations. He then started his own product development firm. He did an MBA in finance and marketing at Wales University. He has 3 Years of experience in investment banking as a financial Analyst for a US-based custodian bank.

Initially he worked as a Tech Lead at BGM Animations and then later Started his own product development firm. He was serving as the CTO For Bravoode Solutions, a mobile application development and creative A web design firm serving the US markets. For the last two years, he has Been working with AZ Internet building block chain applications for clients In various markets. He is currently heading the development of AZ Internet's first own block chain product, FundChain.

Walter Richard
ITCS

Being passionate about information technology and cyber security, Walter graduated with an information system degree and started his role in information technology and cyber security in the technosphere. He has been a crypto investor and is not attempting to contribute innovation that would better the ecosystem.

Reginald Cyril
Financial Advisor

Graduating from the University of London with a bachelor's in economics and finance, Reginald specializes in financial analysis and economics. His analytical skills and strategic initiative along with his interpersonal and communication skills make him an expert in his field. Reginald Has been dedicating his time to various companies including OTIS, Google, and AXA as a financial consultant.

Victor Philip
Business Advisor

Victor Philips, an established international business expert, with experience In Management, HR, training, Construction and Development, Real Estate, F&B and Retail Operations, Prodcut Development, Procurement, Marketing and PR, Service, Excellence and General Advisory and Consulting Services in McDonald's, Fico Corp, Fena Asset, DTAC, Novotel, Holiday Inn, Marriott, Aigner, Verasce, Longchamp, Wine Connection and Vertu.

Sophie
International Business
Development Manager

Sophie is a new youth talent who has experience in marketing with an International government sector and one of UK biggest PLCs. Her Intercultural communication, marketing strategy, management skill, and Her driven motivation will drive BFEX to a successful platform.
